# Interior expertise for complex projects

Big Bull Enterprises represents the broader business vision for integrated interior development, specialized fabrication, furniture and project-based commercial services.

RealCon Workforce, operating as the specialist interior finishing and fit-out business, brings together architectural finishing, carpentry and joinery, solid-surface works, ceilings, partitions, customized fabrication and professional site installation.

Our experience spans healthcare facilities, commercial developments, retail environments and residential interiors, with particular strength in projects requiring coordination between multiple materials, specialist trades and architectural details.

## WHY REALCON WORKFORCE?

### 01 Healthcare interior experience

Reported hospital scope spans nursing counters, bed head units, medical curtain tracks, doors, partitions and specialized surfaces.

### 02 Connected specialist trades

Ceilings, joinery, solid surfaces and fabricated features can be considered together to define interfaces between work packages.

### 03 Detail-led delivery

Approved drawings, sample finishes, site dimensions and coordinated installation sequences guide the proposed engagement.

### 04 A clear commercial basis

Scope, quantities, exclusions, programme and valuation method are agreed before mobilization.

# Architectural foundations

## Ceilings & partitions

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

Gypsum board and tile ceilings, POP ceilings, perforated aluminum ceilings, MDF veneer ceilings, access panels, gypsum partitions and MDF partitions.

## Architectural carpentry & joinery

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

Flush, vision and solid wooden doors; architraves; feature and media walls; wardrobes; kitchen and pantry cabinets; bespoke counters, racks and furniture.

# Surfaces & healthcare

## ◇ Corian / solid surfaces

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

Corian solid-surface counters, window sills, column cladding and louver features, fabricated and installed to approved project details.

## + Healthcare interiors

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

Nursing and reception counters, bed head units, medical curtain tracks, pharmacy or medicine racks and fitted cabinets within the agreed finishing scope.

---

Final materials, performance requirements, specialist interfaces and trade boundaries are agreed for each package. Medical systems and electrical connections require separately defined responsibilities.

# Features & fabrication

## Feature finishes & acoustic works

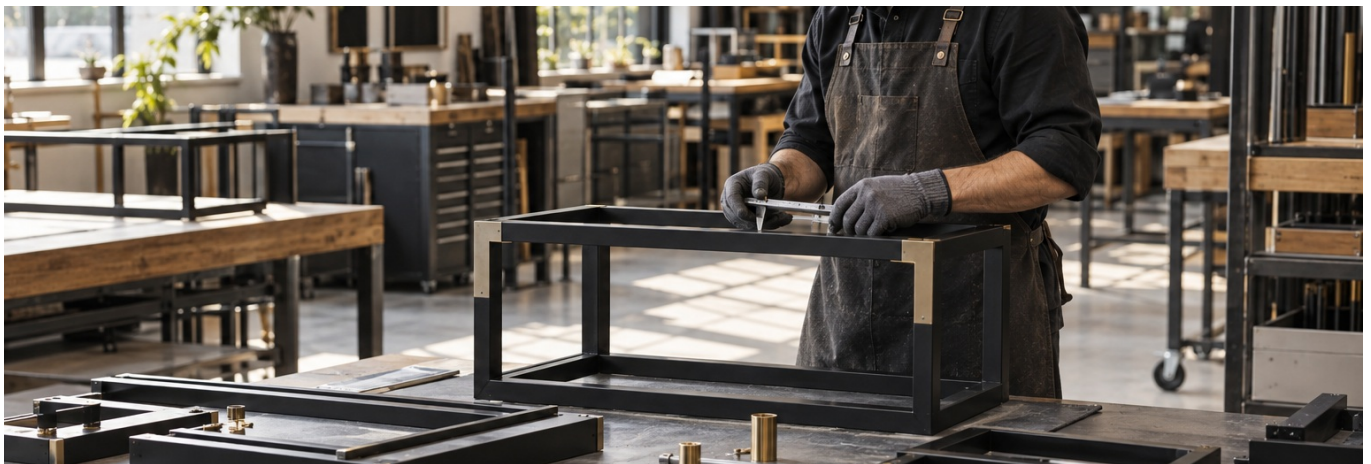

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

Parametric wall fabrication and installation, acoustic treatment and paneling, decorative architectural finishes and associated tile fixing.

## Metal & specialized fabrication

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

MS frames, miscellaneous metal fabrication, ACP elevation work and customized assemblies produced to approved project details.

# Installation & completion

Reference Image — Illustrative Only. Not a RealCon Workforce project photograph.

## Finish, inspect and hand over

Site measurement, fit-out installation, coordination of lighting provisions and access requirements, finishing, rectification and handover support.

## Workshop & fabrication capability

Our reported fabrication scope includes joinery, counters, cabinets, wardrobes, feature panels, solid-surface elements and MS frames. Workshop planning connects approved details with site measurements so components can be checked before installation.

---

Workshop ownership, location, machine inventory, production capacity and available workforce are to be confirmed for prequalification. Project-specific resources and procurement arrangements are agreed before mobilization.

# From approved detail to installed finish

A proposed delivery method tailored to your scope and site programme.

01

## Understand the design

Review drawings and the bill of quantities. Inspect available work areas and identify the project requirements.

02

## Define the scope

Confirm dimensions, interfaces, exclusions, access conditions, priorities and the commercial valuation basis.

03

## Coordinate the details

Develop shop details, material submissions and samples. Resolve interfaces with structure, services, equipment and adjacent trades.

04

## Fabricate accurately

Prepare cutting lists and component schedules. Check dimensions and finishes, trial-assemble where appropriate and plan deliveries.

05

## Install professionally

Deploy the agreed trade teams and sequence installation around site readiness. Inspect against approved details and protect finished work.

06

## Complete & hand over

Close snags, agree completed quantities and compile the agreed handover records.

# Checks at every stage

Proposed quality and site arrangements, agreed for each project.

01

## APPROVE

Material samples, shop details and acceptance criteria agreed with the consultant and main contractor.

02

## CHECK

Dimensional checks, installation inspections and records against approved details.

03

## CLOSE

Snag closure, protection of completed work and agreed handover documentation.

## Health & safety on site

### PPE & briefings

Inductions, task briefings and suitable personal protective equipment.

### Access & permits

Safe access, required permits and coordination of available work areas.

### Housekeeping

Orderly work zones and protection of adjacent finishes and completed work.

### Healthcare controls

Follow facility arrangements for access, dust, noise and infection control in occupied healthcare environments.

---

Coordination should establish who approves details, releases work areas and signs off completed quantities. Regular reviews should record constraints, material lead times, design changes and installation priorities.

# Jinnah Institute of Cardiology, Lahore

Main contractor / client: CCECC | Project authority: IDAP

## PKR 80+ million

Approximate executed / invoiced value — subject to verification

Reported status: Major works completed / handed over; confirmation pending

### Ceilings & architectural features

4 ft × 8 ft gypsum board false ceilings; 2 ft × 2 ft gypsum tile ceilings; perforated aluminum ceilings; MDF veneer ceilings; MDF feature and media walls; access panels; and architectural lighting provisions including rope and SMD lighting.

### Healthcare counters & solid surfaces

Nursing and reception counters; Corian counters and finishes; Corian cladding to double-height columns; Corian window sills; bed head units; medical curtain tracks; and pharmacy or medicine racks and cabinets.

### Joinery, partitions & fabrication

Flush and vision doors; architraves and door finishing; MDF and gypsum partitions; telephone exchange booths; ACP elevation works; MS frames; and miscellaneous fabrication.

A defined specialist finishing package within a larger healthcare development, coordinating accessible ceilings, durable surfaces, fitted furniture and openings.

---

Value relates to RealCon Workforce's work package, not the total hospital construction cost. It is a provisional figure, not an audited invoice total or confirmation of payment received.

# Mother & Child Care Hospital, Attock

Main contractor: CCECC Joint Venture

RealCon Workforce — Project Execution | Attock auditorium. Company archive.

## 35+ million

Reported executed / invoiced value\*

### Acoustic, joinery & interior finishing

\*Values reproduced as stated in the source profile; currency is not separately specified for these entries. All scopes, statuses and values remain subject to confirmation. "Executed" does not establish final certified completion or payment.

# Gulberg City Center & Aurum

Reported client: Zameen Development

RealCon Workforce — Project Execution | Gulberg City Center. Company archive.

## Gulberg City Center, Lahore

**5.4+ million**

POP ceiling works, architectural finishing and parametric wall fabrication and installation.

Reported executed / invoiced value\* | Reported status: Executed

## Aurum

**3.3 million**

Interior and POP ceiling works. Detailed package boundaries, location and completion dates to be confirmed.

Reported executed / invoiced value\* | Reported status: Executed

---

\*Values reproduced as stated; currency is not separately specified for these entries. Each project has its own value field. No combined Zameen portfolio value is stated until underlying project invoices are reconciled.

# A clear basis for every proposal

## COMMERCIAL-VALUE DISCLAIMER

All values refer to the RealCon work package only. Unknown figures remain “To be confirmed”. Invoice dates, taxes, variations, retentions and certified amounts should be reconciled before a final disclosed value is issued. No total portfolio value is claimed.

## Project records

Scopes and statuses are reported portfolio information, subject to confirmation. Client names beyond those stated, work dates and formal completion records remain to be confirmed. “Executed” does not establish final certified completion or payment.

## Package values

The JIC figure is provisional and is not an audited invoice total or confirmation of payment received. Other figures retain the source profile’s “million” notation; their currency is not separately specified and should be confirmed before commercial reliance.

## Scope & commitments

This profile is an invitation to discuss services. Project-specific scope, pricing, resource availability and delivery commitments will be confirmed in a separate proposal. Final materials, performance requirements, specialist interfaces and trade boundaries are agreed for each package.

# Let's discuss your next project

Share your drawings or BOQ, project location, material specifications and target programme. We welcome the opportunity to arrange a site visit, define the work package and prepare a tailored technical and commercial proposal.
